## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Zurbuchen et al. '693.

Zurbuchen et al. discloses a socket wrench comprising: a handle, a solid neck portion and an annular head, a ratchet mechanism in the annular head, wherein the handle, the neck portion and the annular head are formed from a polymer.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zurbuchen et al. in view of Head '651.

Zurbuchen et al. is described above. Zurbuchen et al. does not specifically disclose a wrench constructed of nylon 6. Head discloses the use of nylon 6 for forming tubular parts because of its durability. It would have been obvious to one having ordinary skill

in the art at the time the invention was made to have made the handle of the wrench of Zurbuchen et al. out of nylon 6 as taught by Head because of its durability.

5. Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zurbuchen et al. in view of Head and in further view of Peters 623.

Zurbuchen et al. as modified is described above. The modified Zurbuchen et al. does not specifically disclose a hollow handle for storing a plurality of sockets. Peters discloses a socket wrench having a hollow handle for storing a plurality of sockets so that they may be readily accessible whenever they are needed. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have made the wrench of the modified Zurbuchen et al. to have a hollow handle for storing sockets therein as taught by Peters so as so that they may be readily accessible.
